Professional Experience

Full Stack Developer, Games for Love

July. 2025 – Present

- Dedicated 300+ volunteer engineering hours outside of primary employment to build, test, and maintain a PHP/WordPress gaming platform that brings games to hospitalized children globally.
- Built and maintained an AI chatbot which leverages the Claude API to automate donor and community inquiries, lowering support overhead for a resource-constrained nonprofit.
- Introduced a CI/CD pipeline for Jampack with automated unit and integration tests, reducing deployment errors and streamlining release cycles for future volunteer developers.

Senior Software Engineer, Light & Wonder

June. 2021 – Present

- Designed and built a scalable RESTful API layer with C# and ASP.NET Core, delivering access to bingo utilities, system configuration, and backend updates for a Bingo SaaS product.
- Architected and maintained a GitHub Actions-based CI/CD pipeline integrating automated testing and dockerized builds, reducing release friction and standardizing deployments across environments.
- Led migration of legacy monolithic features to a containerized service using ASP.NET Core and Docker, improving deployment flexibility and isolating system dependencies.
- Re-architected a .NET-based math generation engine using asynchronous processing, reducing simulation time from weeks to days and accelerating game development workflows.
- Collaborated with Product, SQA, and Art teams to design and deliver cross-platform game features (Windows & Linux), integrating Unity front-end components and robust C# backend systems.

Software Test Engineer, Light & Wonder

April. 2019 – June 2021

- Leveraged Python to automate QA workflow and minimize the necessity for manual verification.
- Recognized as Quarterly SQA Leader for highest-impact test case improvements across the department.
- Contributed to the team that Cut GLI resubmissions from 37% to 9% through automation and workflow redesign, saving roughly \$250,000 that year.

Skills

Languages: C# | CSS | HTML | JavaScript | PHP | Python | SQL | Typescript

Web Technologies: ASP.NET Core | Deno Fresh | Preact | React.js | Redux | Tailwind CSS | WordPress

Technologies: | Anthropic | AWS | .NET | Docker | Git/GitHub | Jenkins | Perforce | PostgreSQL | Unity

Education & Certificates

- B.S. Mechanical Engineering, University of Nevada, Reno
- AWS Certified Cloud Practitioner (CLF-C02), Amazon Web Services, 2025

Projects

PokéWeb Adventure – JavaScript | React.js | Redux | HTML/CSS

- An interactive web application which leverages PokéAPI to reimagine the world of Pokémon as a visual novel.

Small Talk – TypeScript | Preact | Tailwind | PostgreSQL

- Architected a full-stack TypeScript application with PostgreSQL-backed relational schema design to support dynamic conversational branching and structured user interaction flows.
